EDUCATION

Indiana University - Bloomington, Indiana May 2028
Luddy School of Informatics, Computing, and Engineering GPA: 3.8
Bachelor of Science in Intelligent Systems Engineering
Cognate: Computer Engineering ·
Minor: Mathematics
Involvement: National Society of Black Engineers (NSBE), Sales Club at Kelley School of Business
Honors: Dean's List (Spring 2025, Fall 2025, Spring 2026) · Hudson and Holland Scholarship
Relevant Coursework: Computer Architecture, Intelligent Systems, Computer Systems

CERTIFICATIONS

AWS Solutions Architect Associate (SAA-C03) - *Amazon Web Services*
AWS Certified Cloud Practitioner (CLF-C02) - *Amazon Web Services*
Forage Mastercard Advisors & Consulting Services Job Simulation - *Forage*

WORK EXPERIENCE

Eaton | Technical Sales Intern May 2026 – Present
• Collaborate with regional sales teams and senior Eaton leaders to assess customer needs across the electrical sector, supporting active sales cycles and building product knowledge in intelligent power management solutions to drive business impact.

Andy Mohr Avon Nissan | Sales Intern June 2025 – Jan 2026
• Leveraged CRM analytics and Excel to identify customer trends, contributing to 45 vehicle sales in 10 weeks.
• Applied data-driven sales strategies and adaptive communication to exceed dealership targets.
• Designed and implemented a structured post-sale follow-up process, achieving a 95% positive feedback rating.

IU Intelligent Systems Engineering Dept. | Teaching Assistant Jan 2025 – Present
• Assist in teaching Innovation and Design to 30 students; hold office hours, grade work, and supervise group projects under faculty supervision.

Luddy Undergraduate Recruiting | Student Ambassador Jan 2025 – Present
• Deliver technical presentations and campus tours, translating complex engineering concepts for prospective students and families.
• Collaborate with faculty and staff to execute recruiting events including Red-Carpet Days and Why Luddy sessions.

Accel Consulting LLC | Software Intern Aug 2023 – Jan 2025
• Built Angular single-page applications, troubleshooting UI issues to ensure accessible and user-friendly designs.
• Analyzed performance metrics to optimize application efficiency, improving GPU rendering and responsiveness.

LEADERSHIP

NSBE Indiana University | Torch Chair 2026 – Present
• Direct TORCH programming for the IU NSBE chapter, coordinating service initiatives, volunteer engagement, and community partnerships to advance NSBE's mission.

TECHNICAL SKILLS

Data: Python (NumPy, Pandas, scikit-learn), Microsoft Excel, SQL
Programming: C, JavaScript, HTML, CSS, Angular
Cloud: AWS (EC2, S3, IAM, VPC, Lambda, CloudWatch), Cloud Security
Data Visualization: Matplotlib, Seaborn
Sales & Business Tools: Bluebeam, Bid Manager, VinSolutions CRM
Systems & Tools: Linux, Windows, macOS, Multisim, Autodesk Fusion
CAD: SolidWorks, Autodesk Inventor

PROJECTS

Highly Available Round-Robin Web Application - AWS
Personal Cloud Engineering Project
• Deployed a multi-AZ web application using EC2, an Application Load Balancer, and a Launch Template with automated user-data configuration to generate unique instance-specific pages.
• Implemented Auto Scaling Group with CPU-based scaling policies, validating load balancing, health checks, and automatic instance replacement under varying traffic conditions.

Embedded Machine Learning Fall Detection System – Raspberry Pi
ENGR-222: Intelligent Systems Engineering II
• Built and trained a CNN (deep learning model) to detect falls and classify activity from motion sensor data, then used Knowledge Distillation to compress the model by 63% (3.29MB to 1.2MB) while keeping accuracy above 92%.
• Deployed the model on a Raspberry Pi using TensorFlow Lite for real-time activity classification with LED-matrix alerts, cutting response time (30-50ms to 10-20ms) and raising accuracy to 93.75%.
